Volume 178 1988/1989

Table of contents

No. 1 1–276 issued on December 1, 1988
No. 2 277–574 issued on December 15, 1988
No. 3 575–810 issued on January 2, 1989

Nomenclature of tetrapyrroles. Recommendations 1986
IUPAC-IUB Joint Commission on Biochemical Nomenclature (JCBN) 277–328

Acknowledgements to Referees 575–580

Reviews

Nucleic acids and nuclear magnetic resonance
F. J. M. Van De Ven and C. W. Hilbers 1– 38

Intracellular transport in interphase and mitotic yeast cells
L. T. Nevalainen and M. Makarow 39– 46

Nucleic acids, protein synthesis, and molecular genetics

Step-wise progression of mammalian 10-kb DNA replication intermediates to mature chromatin
U. Lönn and S. Lönn 47– 51

A novel human myosin alkali light chain is developmentally regulated — Expression in fetal cardiac and skeletal muscle and in adult atria
H.-H. Arnold, P. Lohse, U. Seidel and E. Bober 53– 60

Alternative mechanisms for gene activation induced by poly(rI) · poly(rC) and Newcastle disease virus
R. Lammers, G. Gross, U. Mayr and J. Collins 93– 99

An IncY plasmid-encoded single-stranded DNA-binding protein from *Escherichia coli* shows the identical pattern of stacked tryptophan residues as the chromosomal *ssb* gene product
J. R. Casas-Finet, N.-I. Jhon, M. I. Khamis, A. H. Maki, P. P. Ruvolo and J. W. Chase 101–107

The production of normal and variant human glucose-6-phosphate dehydrogenase in cos cells
P. J. Mason, T. J. Vulliamy, N. S. Foulkes, M. Town, B. Haidar and L. Luzzatto 109–113

Alterations in the d(CpGpT) structure in solution as a result of $[PtCl(diethylenetriamine)]^+$ binding
C. J. Van Garderen, C. Altona and J. Reedijk 115–121

Differences in the binding of H1 variants to DNA — Cooperativity and linker-length related distribution
D. J. Clark and J. O. Thomas 225–233

Purification of the yeast mitochondrial methionyl-tRNA synthetase — Common and distinctive features of the cytoplasmic and mitochondrial isoenzymes
E. Schwob, A. Sanni, F. Fasiolo and R. P. Martin 235–242

Synthesis, cloning and expression in *Escherichia coli* of artificial genes coding for biologically active elongated precursors of the vasoactive intestinal polypeptide
A. Simoncsits, M.-L. Tjörnhammar, M. Kalman, I. Cserpan, G. Gafvelin and T. Bartfai 343–350

Interaction of *Escherichia coli* translation-initiation factor IF-1 with ribosomes
B. Celano, R. T. Pawlik and C. O. Gualerzi 351–355

Fidelity of aminoacylation by rat-liver tyrosyl-tRNA synthetase — Effect of age
R. Takahashi and S. Goto 381–386

Thyroid-specific and cAMP-dependent hypersensitive regions in thyroglobulin gene chromatin
C. Hansen, C. Gerard, G. Vassart, P. Stordeur and D. Christophe 387–393

Isolation and characterization of the bovine κ-casein gene
L. J. Alexander, A. F. Stewart, A. G. Mackinlay, T. V. Kapelinskaya, T. M. Tkach and S. I. Gorodetsky 395–401

The binding of double-stranded RNA and adenovirus VAI RNA to the interferon-induced protein kinase
J. Galabru, M. G. Katze, N. Robert and A. G. Hovanessian 581–589

Isoleucyl-tRNA synthetase from baker's yeast — Discrimination of 20 amino acids in aminoacylation of $tRNA^{Ile}$-C-C-3'dA; role of terminal hydroxyl groups in aminoacylation of $tRNA^{Ile}$-C-C-A
W. Freist and H. Sternbach 595–602

cDNA cloning and complete primary structure of the small, active subunit of human carboxy-peptidase N (kininase 1)
W. Gebhard, M. Schube and M. Eulitz 603–607

Regulation of gene expression at the translational level — The rescue factor reverses thermosensitive protein synthesis in N4316, a conditionally-lethal mutant of *Escherichia coli* defective in translation
M. C. Ganoza, D. C. Knauber, B. Murphy, D. Fallavolita and D.-G. Chung 663–674

The roles of the *nifW*, *nifZ* and *nifM* genes of *Klebsiella pneumoniae* in nitrogenase biosynthesis
W. Paul and M. Merrick 675–682

A ^{19}F-NMR study of 2-fluoro-4-demethoxy-daunomycin intercalation complexes with the decanucleotides d(G-C)$_5$ and d(A-T)$_5$
B. C. Hammer, R. A. Russell, R. N. Warrener and J. G. Collins 683–688

Heme may not be a positive regulator of cytochrome-*P*450 gene expression
G. Srivastava, M. J. Bawden, A. J. Hansen and B. K. May 689–692

Protein chemistry and structure

Tubulin oligomers and microtubule oscillations – Antagonistic role of microtubule stabilizers and destabilizers
G. Lange, E.-M. Mandelkow, A. Jagla and E. Mandelkow 61– 69

Characterization of proteolytic fragments of the laminin-nidogen complex and their activity in ligand-binding assays
K. Mann, R. Deutzmann and R. Timpl 71– 80

Secondary structure of the Arg-Gly-Asp recognition site in proteins involved in cell-surface adhesion – Evidence for the occurrence of nested β-bends in the model hexapeptide GRGDSP
J. Reed, W. E. Hull, C.-W. von der Lieth, D. Kübler, S. Suhai and V. Kinzel 141–154

Three-dimensional structure of proteinase K at 0.15-nm resolution
C. Betzel, G. P. Pal and W. Saenger 155–171

Large-scale preparation and reconstitution of apo-flavoproteins with special reference to butyryl-CoA dehydrogenase from *Megasphaera elsdenii* – Hydrophobic-interaction chromatography
W. J. H. Van Berkel, W. A. M. Van den Berg and F. Müller 197–207

Folding of collagen IV
R. Dölz, J. Engel and K. Kühn 357–366

Panulirus interruptus hemocyanin – The amino acid sequence of subunit b and anomalous behaviour of subunits a and b on polyacrylamide gel electrophoresis in the presence of SDS
P. A. Jekel, H. J. Bak, N. M. Soeter, J. M. Vereijken and J. J. Beintema 403–412

Complete amino acid sequence of the neurone-specific γ isozyme of enolase (NSE) from human brain and comparison with the non-neuronal α form (NNE)
S. M. McAleese, B. Dunbar, J. E. Fothergill, L. J. Hinks and I. N. M. Day 413–417

NMR studies of the conformations of leghemoglobins from soybean and lupin
S. S. Narula, C. Dalvit, C. A. Appleby and P. E. Wright 419–435

Cell-surface heparan sulfate and heparan-sulfate/chondroitin-sulfate hybrid proteoglycans of mouse mammary epithelial cells
G. David and H. Van Den Berghe 609–617

A crystallographic study of the glutathione binding site of glutathione reductase at 0.3-nm resolution
P. A. Karplus, E. F. Pai and G. E. Schulz 693–703

Photochemically-induced dynamic nuclear polarization proton-NMR of aequorin discharged by calcium-independent light emission
B. D. Ray, R. M. Scheek, M. D. Kemple, F. G. Prendergast and B. D. Nageswara Rao 705–709

Enzymology

Inhibition of uridine phosphorylase by pyrimidine nucleoside analogs and consideration of substrate binding to the enzyme based on solution conformation as seen by NMR spectroscopy
Z. Veres, A. Neszmélyi, A. Szabolcs and G. Dénes 173–181

Purification, characterization and induction of L-phenylalanine ammonia-lyase in *Phaseolus vulgaris*
A. da Cunha 243–248

Probing the active site of flavocytochrome b_2 by site-directed mutagenesis
G. A. Reid, S. White, M. T. Black, F. Lederer, F. S. Mathews and S. K. Chapman 329–333

Kinetic and biochemical properties of CTP:choline-phosphate cytidyltransferase from the rat brain
F. Mages, C. Rey, P. Fonlupt and H. Pacheco 367–372

Separation and characterization of four enzyme forms of β-galactosidase from *Saccharomyces lactis*
A. Mbuyi-Kalala, A. G. Schnek and J. Léonis 437–443

Catalytic-site mapping of pyruvate formate lyase – Hypophosphite reaction on the acetyl-enzyme intermediate affords carbon-phosphorus bond synthesis (1-hydroxyethyl-phosphonate)
W. Plaga, R. Frank and J. Knappe 445–450

Yeast adenylate kinase is active simultaneously in mitochondria and cytoplasm and is required for non-fermentative growth
W. Bandlow, G. Strobel, C. Zoglowek, U. Oechsner and V. Magdolen 451–457

Thermostable DNA polymerase from the archaebacterium *Sulfolobus acidocaldarius* – Purification, characterization and immunological properties
C. Elie, A. M. De Recondo and P. Forterre 619–626

Purification of GTP cyclohydrolase I from human liver and production of specific monoclonal antibodies
G. Schoedon, U. Redweik and H.-C. Curtius 627–634

Mechanism and binding specificity of β-glucosidase-catalyzed hydrolysis of cellobiose analogues studied by competition enzyme kinetics monitored by ^{1}H-NMR spectroscopy
K. Bock and B. W. Sigurskjold 711–720

Carbohydrates, lipids and other natural products

Novel transcellular interaction: conversion of granulocyte-derived leukotriene A$_4$ to cysteinyl-containing leukotrienes by human platelets
C. Edenius, K. Heidvall and J. Å. Lindgren 81– 86

Isolation of a mutant from *Salmonella typhimurium* producing acyl-deficient lipopolysaccharides
V. Lehmann and B. Benninghoff 459–464

Structural studies on the neutral polysaccharide of *Bacillus subtilis* AHU 1219 cell walls
H. Iwasaki, Y. Araki, S. Kaya and E. Ito 635–641

Structural studies on the amino-acid-linked teichuronic acid of *Bacillus subtilis* AHU 1219 cell walls
H. Iwasaki, Y. Araki, S. Kaya and E. Ito 643–648

Interactions of concanavalin A with asparagine-linked glycopeptides – Structure/activity relationships of the binding and precipitation of oligomannose and bisected hybrid-type glycopeptides with concanavalin A
L. Bhattacharyya and C. F. Brewer 721–726

Conformational analysis of sialyl$\alpha(2\rightarrow3/6)$*N*-acetyllactosamine structural element occurring in glycoproteins, by two-dimensional NOE ^{1}H-NMR spectroscopy in combination with energy calculations by hard-sphere exo-anomeric and molecular mechanics force-field with hydrogen-bonding potential
J. Breg, L. M. J. Kroon-Batenburg, G. Strecker, J. Montreuil and J. F. G. Vliegenthart 727–739

In vitro synthesis of colominic acid by membrane-bound sialyltransferase of *Escherichia coli* K-235 – Kinetic properties of this enzyme and inhibition by CMP and other cytidine nucleotides
A. I. Ortiz, A. Reglero, L. B. Rodríguez-Aparicio and J. M. Luengo 741–749

Physical and inorganic biochemistry

Visualization of reversible macromolecular reactions in an analytical ultracentrifuge
V. Ya. Chernyak and V. V. Kogan-Yasny 465–469

Fluorescence-quenching-resolved spectra of fluorophores in mixtures and micellar solutions
Z. Wasylewski, P. Kaszycki, A. Guz and W. Stryjewski 471–476

Domain preference in iron removal from human transferrin by the bacterial siderophores aerobactin and enterochelin
S. Ford, R. A. Cooper, R. W. Evans, R. C. Hider and P. H. Williams 477–481

Nitrous oxide reductase from *Pseudomonas stutzeri* – Redox properties and spectroscopic characterization of different forms of the multicopper enzyme
J. Riester, W. G. Zumft and P. M. H. Kroneck 751–762

Membranes and bioenergetics

Oxidation of glycolipids in liposomes by galactose oxidase
A. Lampio, I. Siissalo and C. G. Gahmberg 87– 91

Tritium thermal activation study of bacteriorhodopsin topography
V. I. Tsetlin, T. N. Alyonycheva, V. V. Shemyakin, L. A. Neiman and V. T. Ivanov 123–129

The K^+-translocating Kdp-ATPase from *Escherichia coli* – Purification, enzymatic properties and production of complex- and subunit-specific antisera
A. Siebers and K. Altendorf 131–140

Structural determination of the photosystem II core complex from spinach
K.-D. Irrgang, E. J. Boekema, J. Vater and G. Renger 209–217

Infrared spectroscopic studies of *Acholeplasma laidlawii* B membranes – Comparison of the gel to liquid-crystal phase transition in intact cells and isolated membranes
H. H. Mantsch, P. W. Yang, A. Martin and D. G. Cameron 335–341

Distances between functional sites in cardiac sarcoplasmic reticulum ($Ca^{2+}+Mg^{2+}$)-ATPase – Inter-lanthanide energy transfer
N. B. Joshi and A. E. Shamoo 483–487

Kinetic evidence for a heart mitochondrial pore activated by Ca^{2+}, inorganic phosphate and oxidative stress – A potential mechanism for mitochondrial dysfunction during cellular Ca^{2+} overload
M. Crompton and A. Costi 489–501

Oxidation-reduction thermodynamics of the acceptor quinone complex in whole-membrane fragments from *Chloroflexus aurantiacus*
G. Venturoli and D. Zannoni 503–509

Altered relationship between protonmotive force and respiration rate in non-phosphorylating liver mitochondria isolated from rats of different thyroid hormone status
R. P. Hafner, C. D. Nobes, A. D. McGown and M. D. Brand 511–518

Electron-transport-driven sodium extrusion during methanogenesis from formaldehyde and molecular hydrogen by *Methanosarcina barkeri*
V. Müller, C. Winner and G. Gottschalk 519–525

An atypical heme-binding structure of cytochrome c_1 of *Euglena gracilis* mitochondrial complex III
K. Mukai, M. Yoshida, H. Toyosaki, Y. Yao, S. Wakabayashi and H. Matsubara 649–656

Characterization and application of a thermostable primary transport system: Cytochrome-*C* oxidase from *Bacillus stearothermophilus*
W. De Vrij, R. I. R. Heyne and W. N. Konings 763–770

Metabolism and metabolic regulation

Comparison of the metabolism of dodecanedioic acid *in vivo* in control, riboflavin-deficient and clofibrate-treated rats
J.-P. Draye, K. Veitch, J. Vamecq and F. Van Hoof 183–189

Stimulation of thromboxane release by extracellular UTP and ATP from perfused rat liver – Role of icosanoids in mediating the nucleotide responses
D. Häussinger, E. Busshardt, T. Stehle, B. Stoll, M. Wettstein and W. Gerok 249–256

Regulation of the expression of the phospho*enol*pyruvate carboxykinase gene in cultured rat hepatocytes by glucagon and insulin
B. Christ, A. Nath, H. Bastian and K. Jungermann 373–379

Signal transreduction and molecular neurobiology

The large glycoprotein subunit of the skeletal muscle voltage-sensitive calcium channel — Deglycosylation and development
A. J. Burgess and R. I. Norman 527–533

Site-specific phosphorylation of the purified receptor for calcium-channel blockers by cAMP- and cGMP-dependent protein kinases, protein kinase C, calmodulin-dependent protein kinase II and casein kinase II
H. Jahn, W. Nastainczyk, A. Röhrkasten, T. Schneider and F. Hofmann 535–542

Interactions between discrete neuronal membrane binding sites for the putative K^+-channel ligands β-bungarotoxin, dendrotoxin and mast-cell-degranulating peptide
A. L. Breeze and J. O. Dolly 771–778

Molecular cell biology

Involvement of a serine protease in tumour-necrosis-factor-mediated cytotoxicity
P. Suffys, R. Beyaert, F. Van Roy and W. Fiers 257–265

Quantification and characterization of regulin, a M_r-230000 highly elongated protein of rabbit reticulocytes
G. Zardeneta, G. Kramer and B. Hardesty 267–276

Characterization of an inhibitor of actin polymerization in vinculin-rich fraction of turkey gizzard smooth muscle
T. Miron, M. Wilchek and B. Geiger 543–553

Low-density-lipoprotein-receptor mRNA content of fibroblasts from normal and familial hypercholesterolaemic subjects
B. L. Knight, D. D. Patel, S. J. P. Gavigan and A. K. Soutar 555–561

Erythrocyte adducin — Comparison of the α- and β-subunits and multiple-site phosphorylation by protein kinase C and cAMP-dependent protein kinase
A. Waseem and H. C. Palfrey 563–573

Tropomyosin in the sea urchin egg cortex
S. Maekawa, M. Toriyama and H. Sakai 657–662

Conserved epitopes on plant H1 histones recognized by monoclonal antibodies
L. Mazzolini, M. Vaeck and M. Van Montagu 779–787

Regulation of ornithine decarboxylase in murine erythroleukemic cells by *N,N'*-diacetyl-1,6-hexanediamine and *N*-acetyl-1,6-hexanediamine
P. Papazafiri and H. B. Osborne 789–793

The *Aspergillus* toxin restrictocin is a suitable cytotoxic agent for generation of immunoconjugates with monoclonal antibodies directed against human carcinoma cells
F. M. P. Conde, R. Orlandi, S. Canevari, D. Mezzanzanica, M. Ripamonti, S. Muñoz, P. Jorge and M. I. Colnaghi 795–802

Developmental biochemistry and immunology

Accumulation of carbamoylphosphate-synthetase and phospho*enol*pyruvate-carboxykinase mRNA in embryonic rat hepatocytes — Evidence for translational control during the initial phases of hepatocyte-specific gene expression *in vitro*
M. A. van Roon, D. Zonneveld, R. Charles and W. H. Lamers 191–196

Monoclonal antibody recognizes a conformational epitope in a random coil protein
B. Saad, G. Corradin and H. R. Bosshard 219–224

Altered expression of myosin light-chain isoforms in chronically stimulated fast-twitch muscle of the rat
A. Bär, J.-A. Simoneau and D. Pette 591–594

Developmental regulation of expression of the regulatory subunit of the cAMP-dependent protein kinase of *Blastocladiella emersonii*
M. do V. Marques, M. H. Juliani, J. C. C. Maia and S. L. Gomes 803–810

Indexed in *Current Contents*
